SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)

Department of Computer Science and Engineering

ASSESSMENT TOOL 1 – PSEUDOCODE WRITING

Course Code:	ITA03	**Course Title:**	Mobile computing
CO Assessed:	CO3 – Precision (BL3)	**Assessment:**	Assessment Tool 1– Pseudocode
Weightage:	30 % of CIA	**Total Marks:**	100
CO3 Statement:	*Implement wireless networking and Mobile IP concepts for routing in cellular and ad hoc networks.. (BTL 3)*		
Student Name:	SYED MADEEHA ANJUM	**Reg. No.:**	192511208
Section / Batch:	BATCH 2025-2029	**Date:**	22 OCT 2026

Code of Conduct

I SYED MADEEHA ANJUM / 192511208 *(Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.*

Signature of the Student: _____

Instructions

- Duration: 1 hour
- Answer all Questions
- Write Pseudocode in paper and upload program in GITHUB

EXPERIMENT 1: HEALTH AND SELF-CARE MOBILE APP

AIM

To design a user-friendly mobile application that promotes mental well-being through meditation, exercises, health routine blogs, and self-care blogs.

PSEUDOCODE

START

1. Display the Login page.
2. If the user has an account, enter the username and password and validate the login details.
3. Otherwise, allow the user to register and save the registration details.
4. Display the Home page.
5. Show Health Routine Blogs.
6. Show Self-Care Blogs.
7. Allow the user to explore meditation exercises and read the blogs.
8. STOP.

OUTPUT

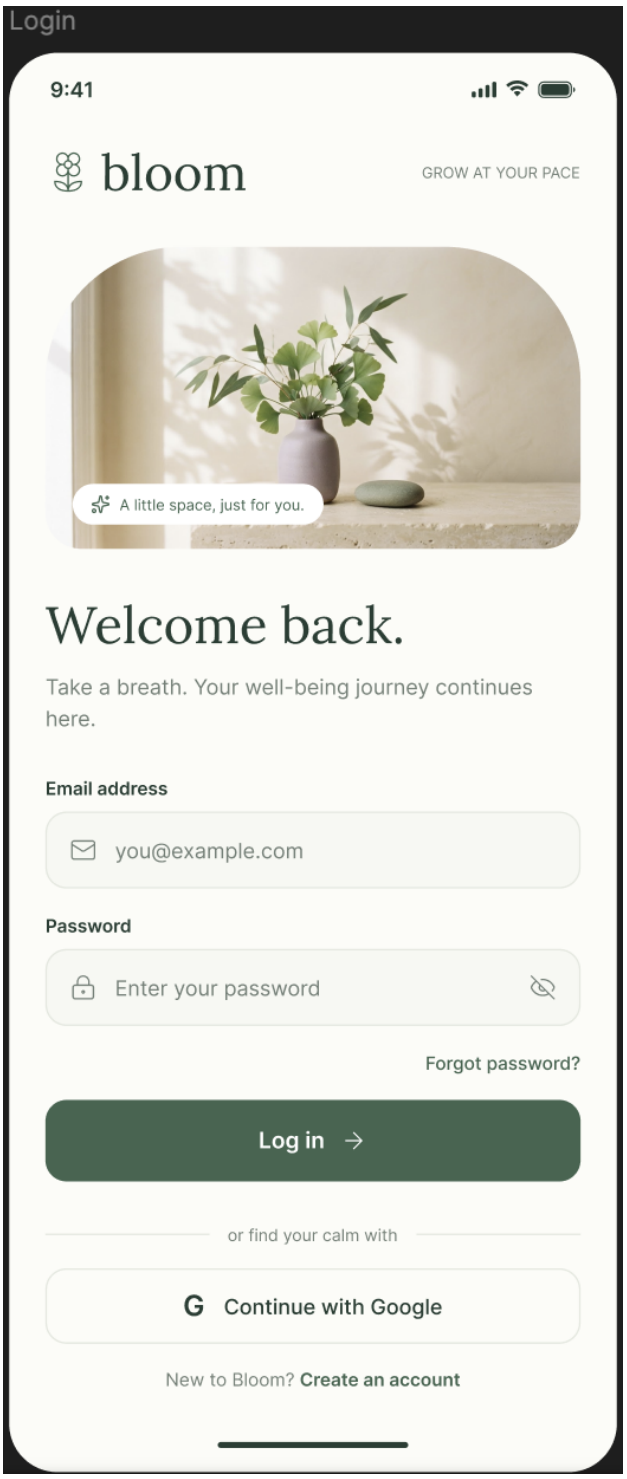

Figure 1.1: Login

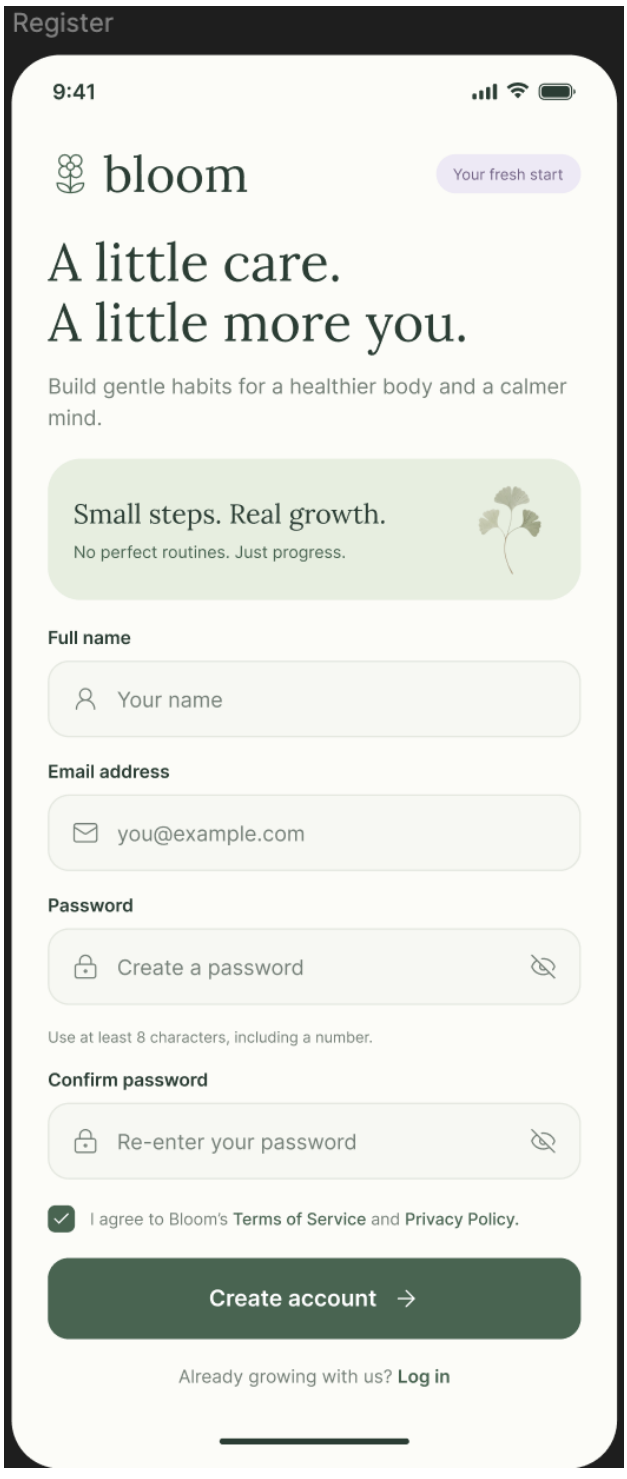

Figure 1.2: Register

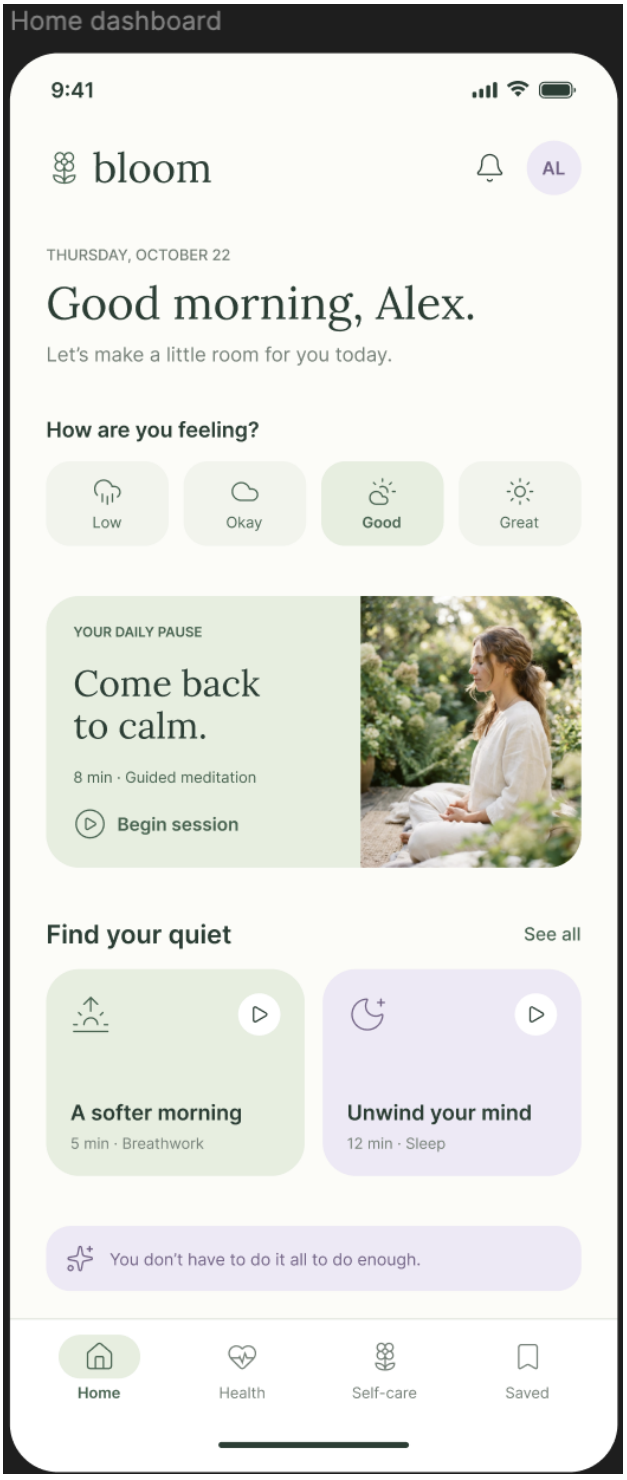

Figure 1.3: Home

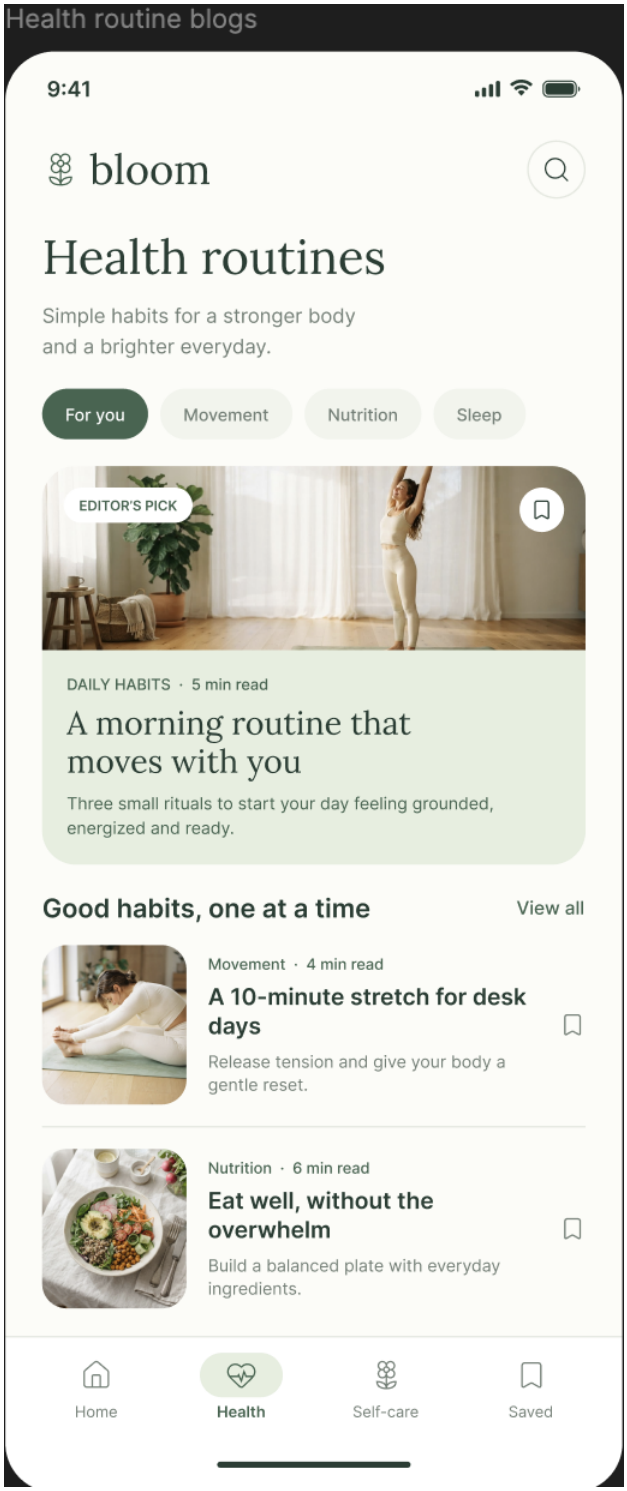

Figure 1.4: Health Routine Blogs

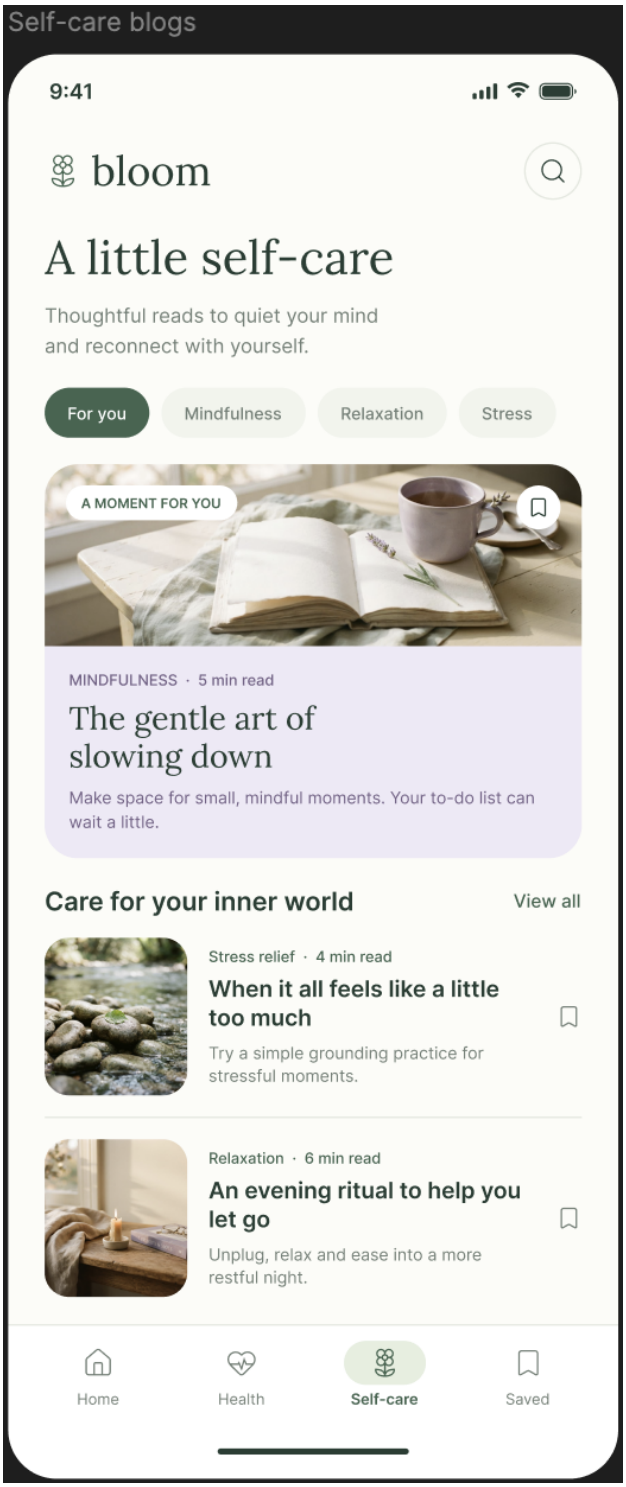

Figure 1.5: Self-Care Blogs

RESULT

The Health and Self-Care Mobile App UI was designed with login, registration, health routine blogs, and self-care blogs to support users' mental well-being.

EXPERIMENT 2: INTELLIGENT JOB ASSISTANT MOBILE APP

AIM

To design an intelligent job assistant mobile application that helps users find suitable jobs through registration, subscription, personal details, resume upload, and job selection.

PSEUDOCODE

START

1. Display the Login page.
2. If the user is new, register the user; otherwise, validate the login details.
3. Display the available subscription plans.
4. Allow the user to select a subscription plan.
5. Collect the user's personal details.
6. Allow the user to upload a resume.
7. Analyze the user's profile and skills.
8. Display suitable job recommendations.
9. Allow the user to select a job.
10. STOP.

OUTPUT

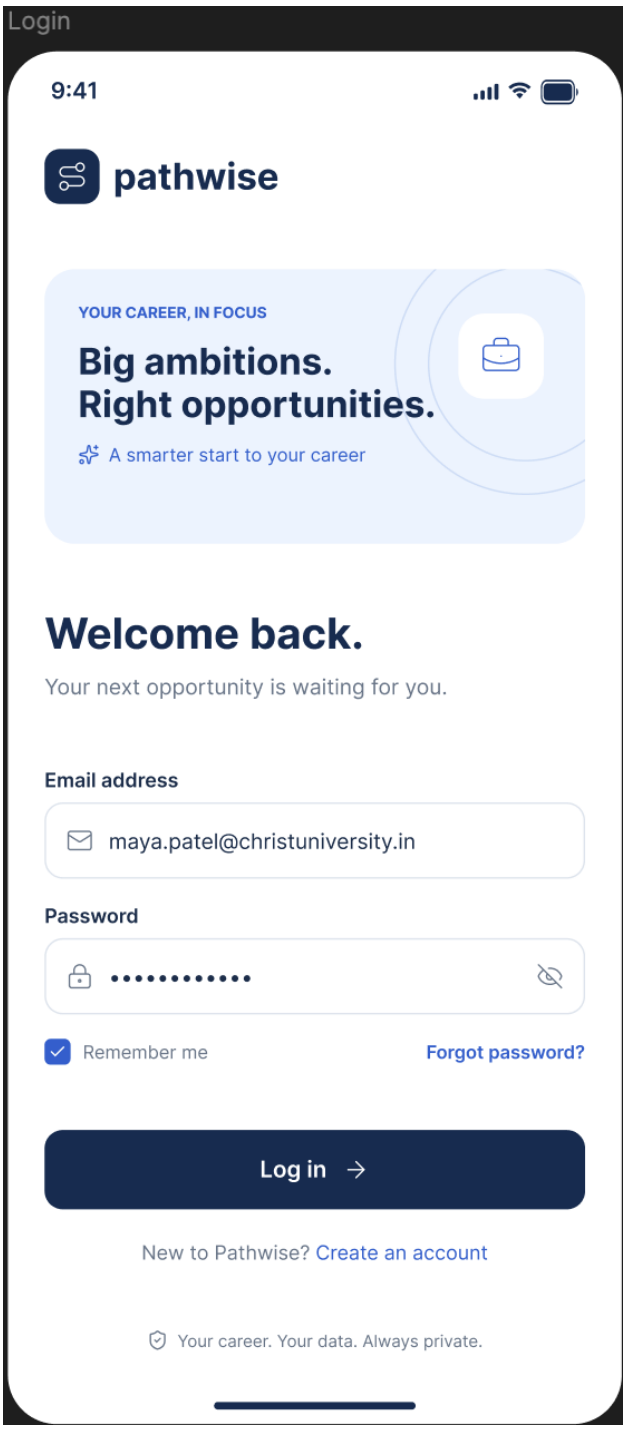

Figure 2.1: Login

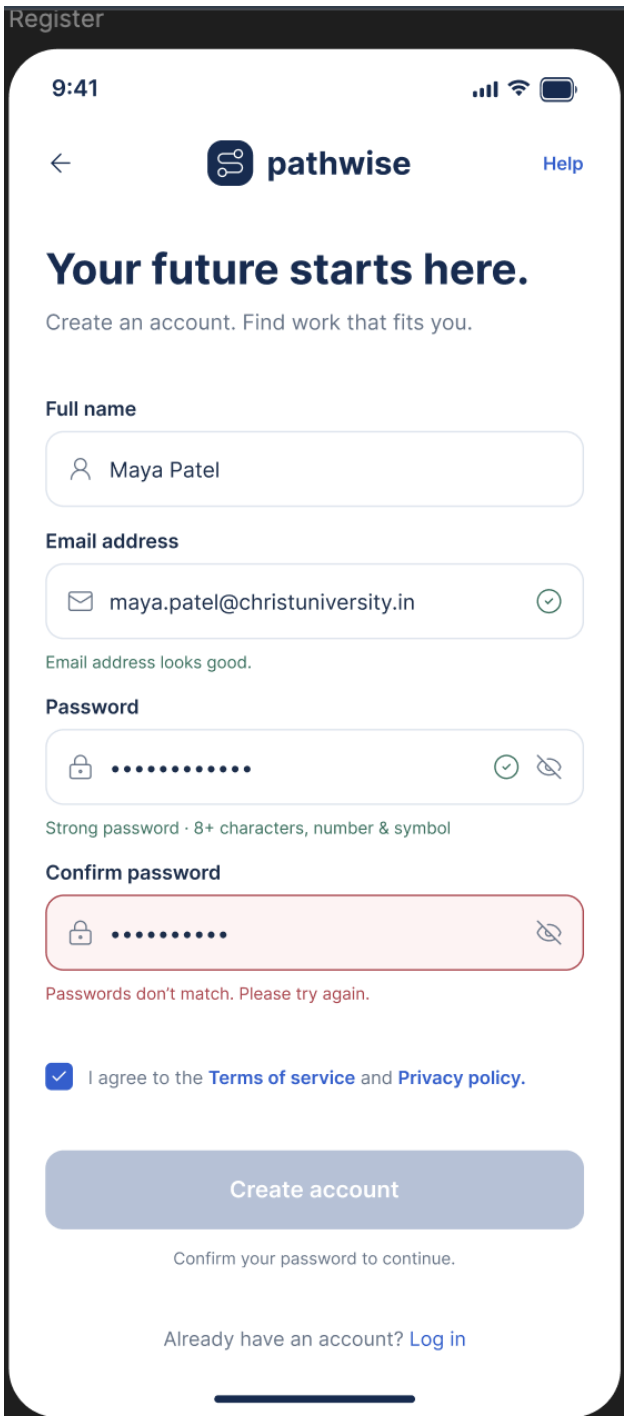

Figure 2.2: Register

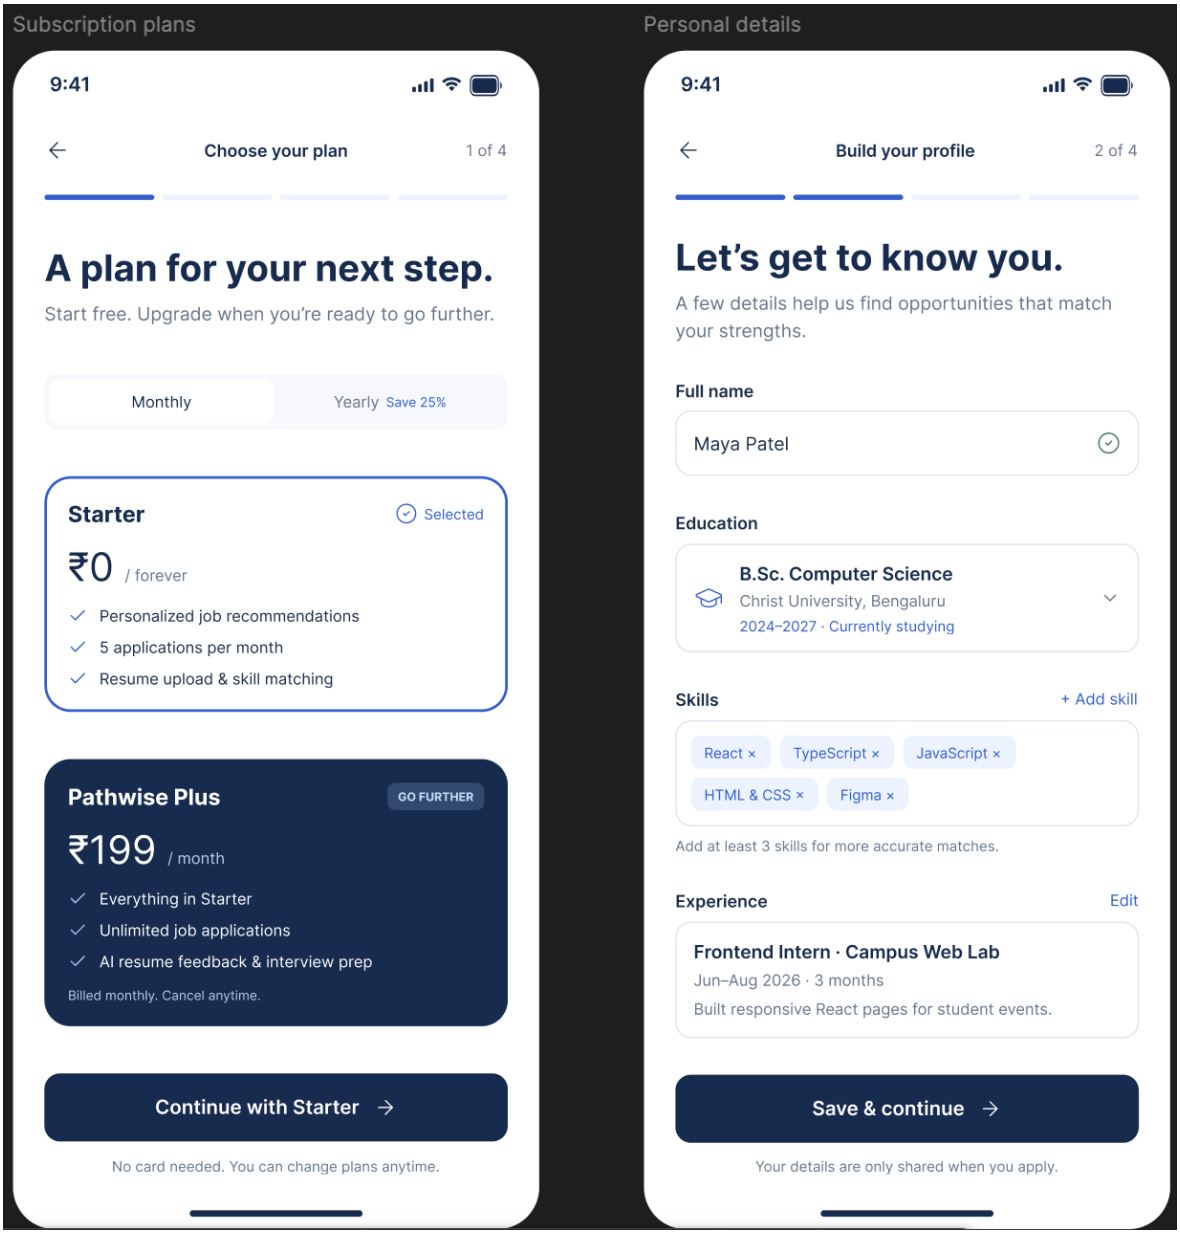

Figure 2.3: Subscription Plans and Personal Details

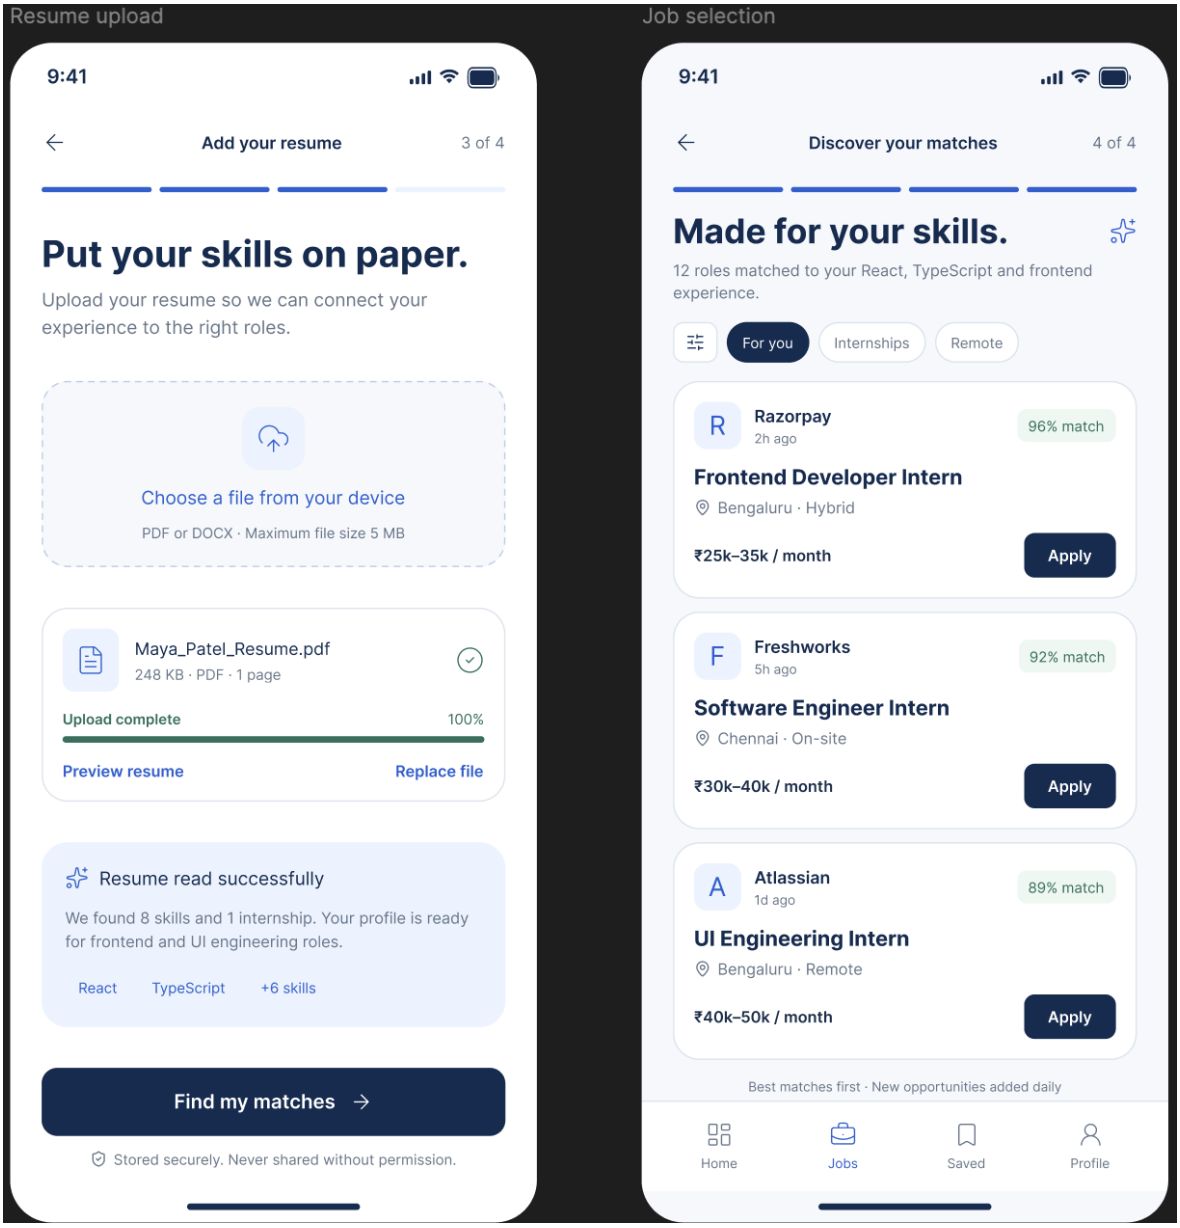

Figure 2.4: Resume Upload and Job Selection

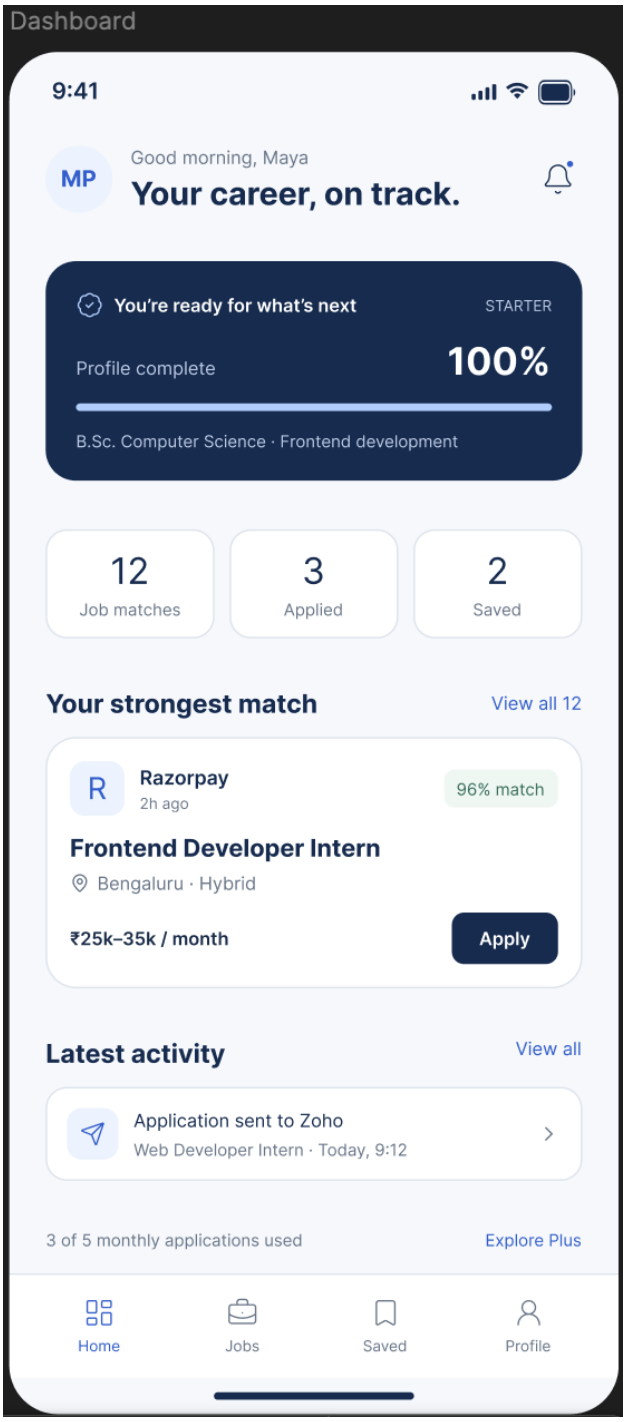

Figure 2.5: Dashboard

RESULT

The Intelligent Job Assistant Mobile App UI was designed with login, registration, subscription, personal details, resume upload, and job selection features.

EXPERIMENT 3: SMART PARKING MOBILE APP

AIM

To design a smart parking mobile application that enables users to check empty parking spaces, view available slots, and book parking spaces conveniently.

PSEUDOCODE

START

1. Display the Login page.
2. If the user is new, register the user; otherwise, validate the login details.
3. Display the Parking Dashboard.
4. Count and display the empty parking slots.
5. Display the available parking slots.
6. If parking slots are available:
    - Allow the user to select a parking slot.
    - Display the booking details.
    - Confirm the booking.
    - Update the slot availability.
7. Otherwise, display "No Slots Available".
8. STOP.

OUTPUT

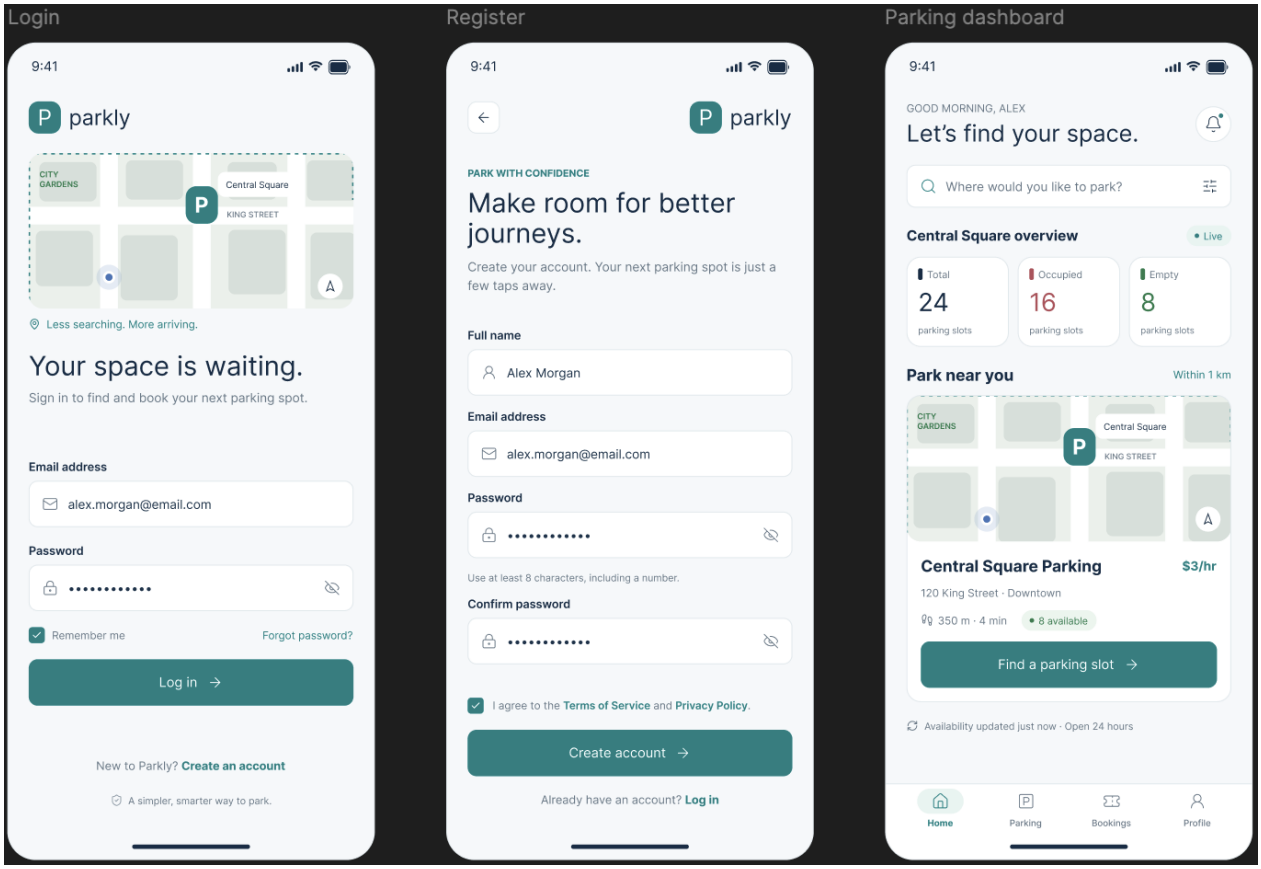

Figure 3.1: Login, Register and Parking Dashboard (Empty Parking Count)

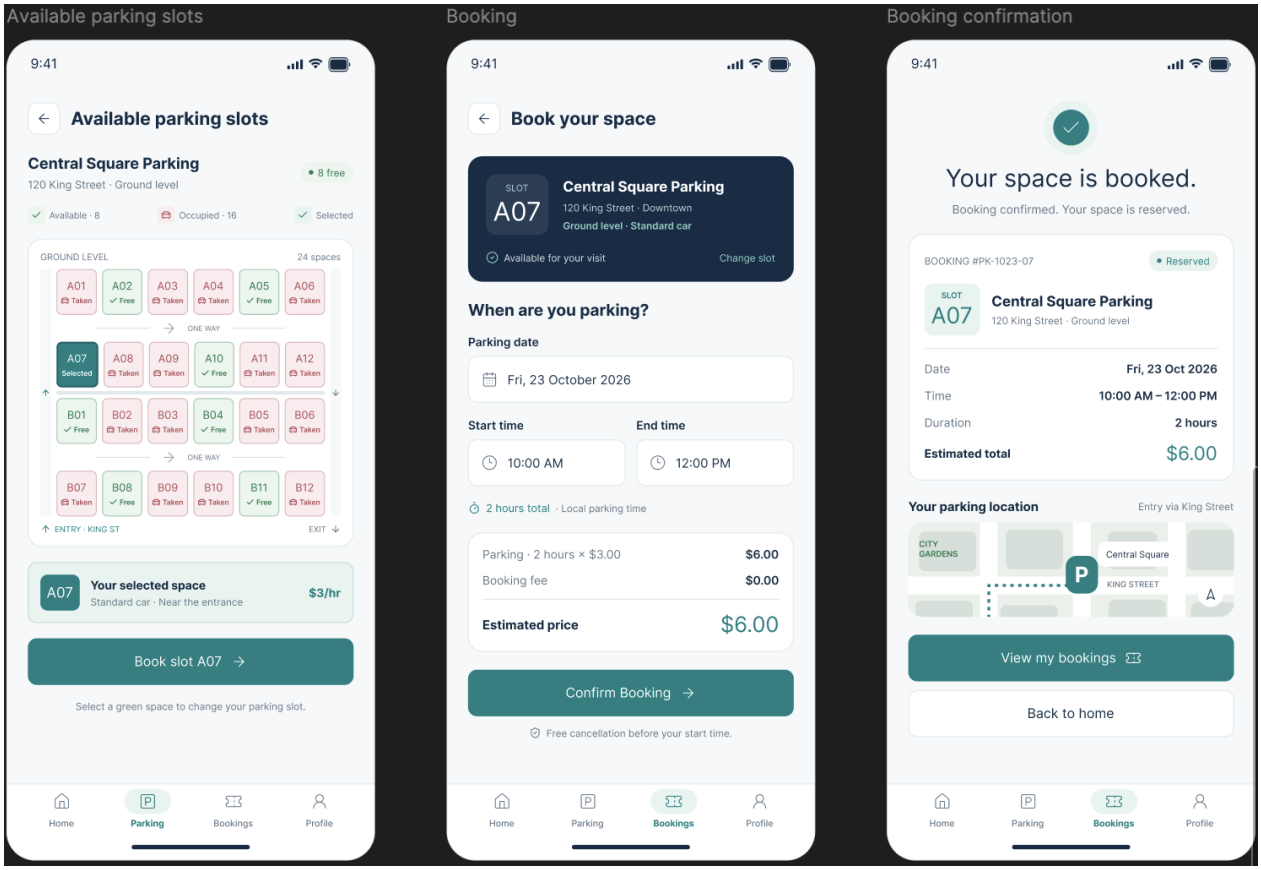

Figure 3.2: Available Parking Slots, Booking and Booking Confirmation

RESULT

The Smart Parking Mobile App UI was designed with login, registration, empty parking count, available parking display, and parking slot booking features.

EXPERIMENT 4: ONLINE BODY FITNESS MOBILE APP

AIM

To design a user-friendly fitness mobile application that supports daily fitness routines through fitness blogs, diet planning, workout videos, and payment and subscription facilities.

PSEUDOCODE

START

1. Display the Login page.
2. If the user is new, register the user; otherwise, validate the login details.
3. Display the Home page.
4. Show Fitness Blogs.
5. Show the Diet Planner.
6. Show Fitness Videos.
7. If the user selects premium content:
    - Display subscription plans.
    - Allow the user to select a plan.
    - Process the payment.
    - If payment is successful, unlock premium content.
    - Otherwise, display "Payment Failed".
8. STOP.

OUTPUT

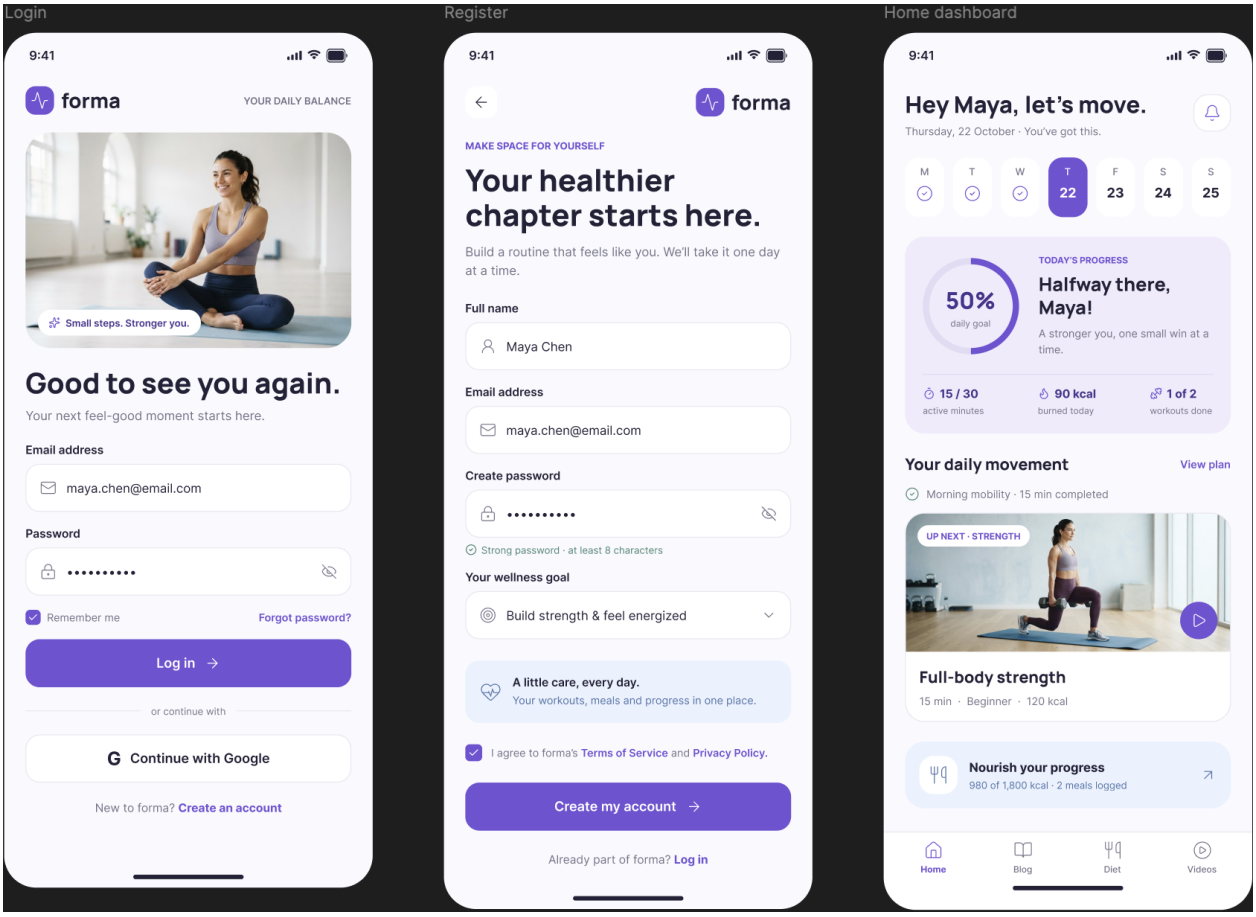

Figure 4.1: Login, Register and Home Dashboard

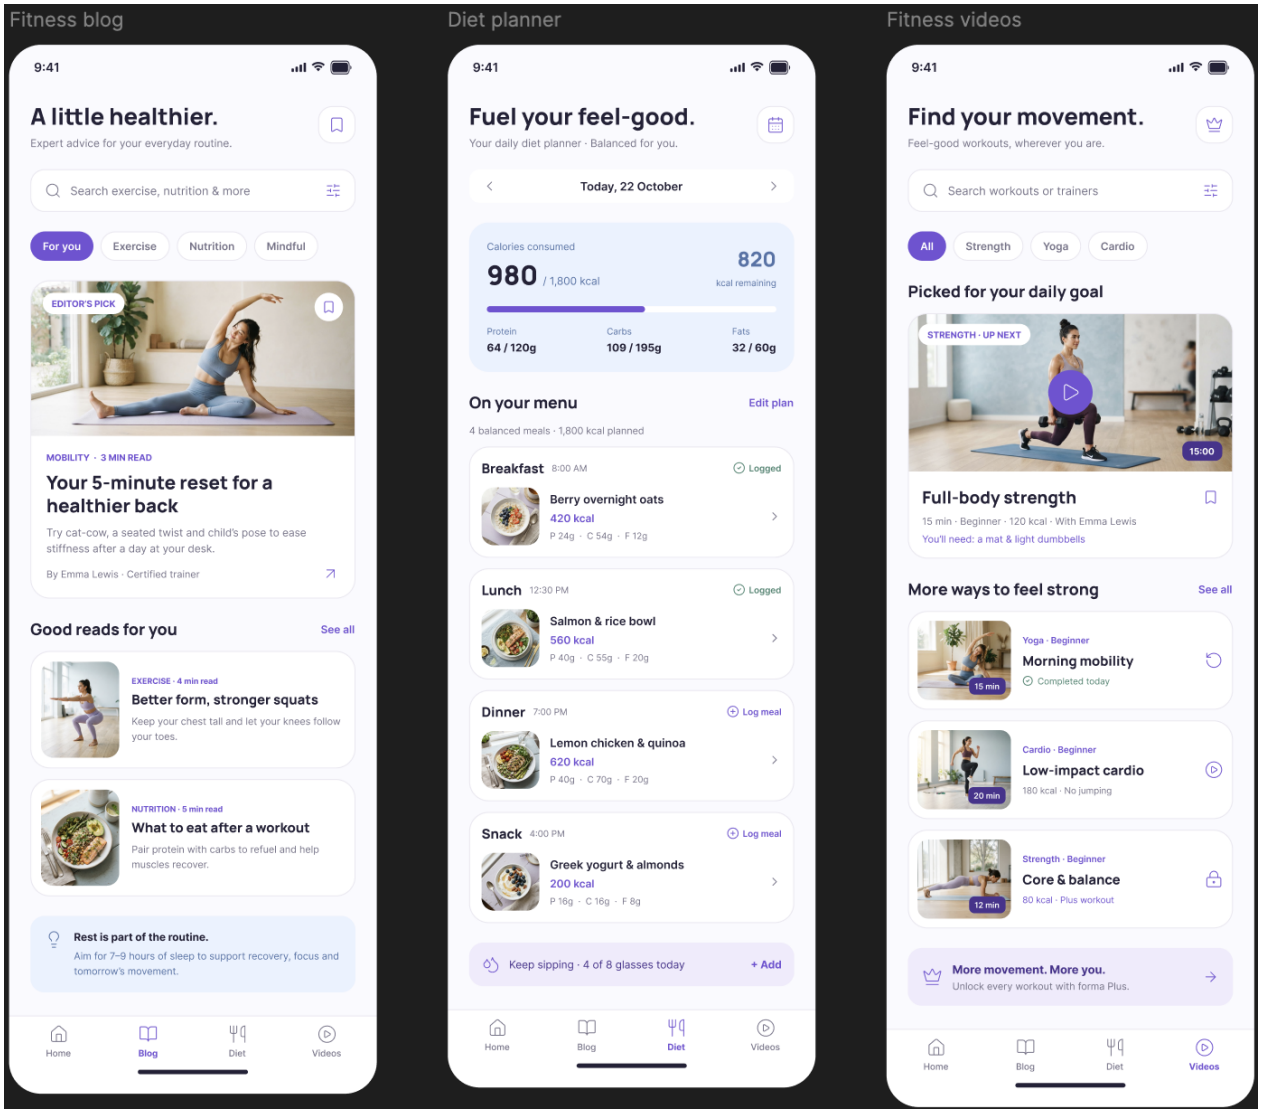

Figure 4.2: Fitness Blog, Diet Planner and Fitness Videos

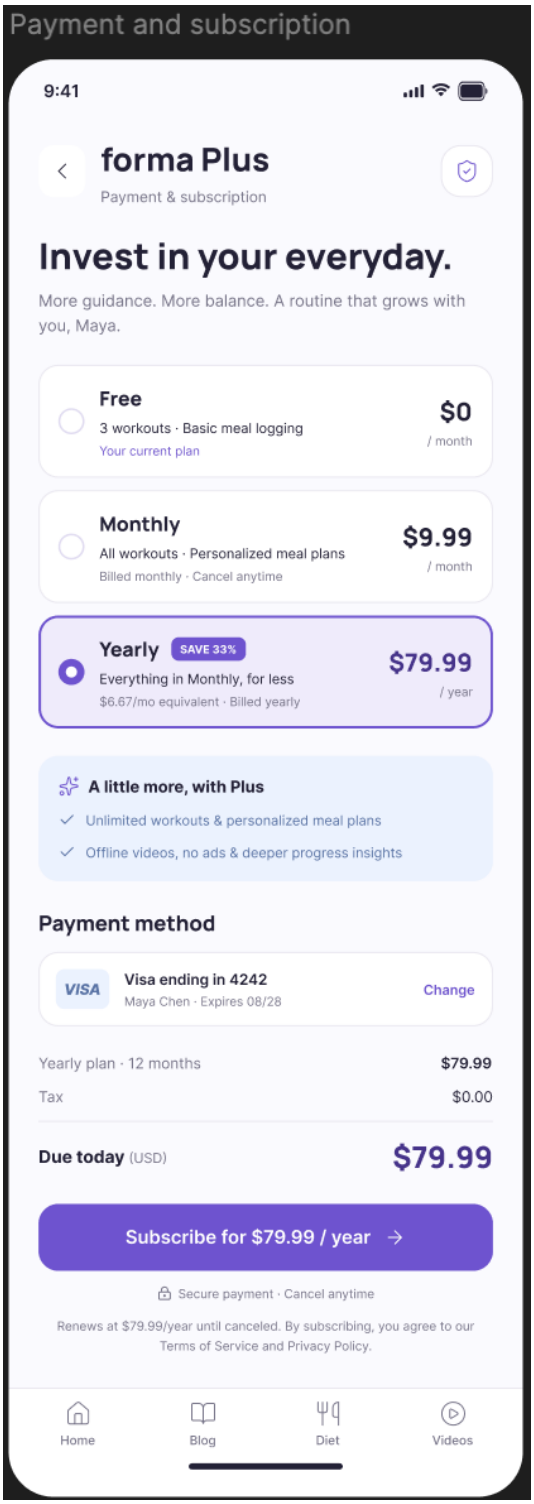

Figure 4.3: Payment and Subscription

RESULT

The Online Body Fitness Mobile App UI was designed with login, registration, fitness blogs, diet planning, fitness videos, and payment and subscription features.
